Reds Called Sure Victor In Election

COPYRIGHT

It is easy to predict who will win the election this fall: the Communists.

You have to read the small print in the news to realize the apathy of the American people and the extent of the danger.

A recent AP story, two paragraphs: The Soviet defector who has been feeding us information for years says, "Little, if anything, has been done to run down or clean out the KGB (Russian spies) men on American payrolls and though he fed them facts and exposures on them to the C.I.A., beginning in 1960.

Also, instead of having his information used for a clean-out job, he charges, he has been thwarted by amateurs and "Stalinists" in the C.I.A. and even kept from communicating his plight to responsible higher officials.

Why isn't something done about this now? Today!

I have too many friends in the Democrat party to say that any one party is responsible. But the liberal-labor-socialists under the banner of the Democrat party have controlled the government 32 out of the past 36 years. History proves they will only do two fundamental things: coddle Communists and spend more money than we take in.

All our major embassies and the C.I.A. and State Department are infiltrated. It is a proven fact, now. Yet, does anyone want to bet anything will be done about it?

The Panamanian Ambassador arrived in Washington three weeks before the riots, and couldn't get an audience. Fifty billion for "defense," and the proven defectors in the State Department aren't even named. Chances are they will never even have their wrists slapped.

No sense in worrying about the election—the Communists have it in the bag.
